Dear Ms. Spencer,

This is to acknowledge receipt of your email. I am forwarding your email to our Clerk's Office for processing. Your email will become a part of ND-2015-20-E – (Duke Energy Carolinas: Foothills Transmission and Substation Project - 45-Mile Transmission Line Between Asheville, NC, Power Plant and New Substation Near Campobello, SC) and will be posted on our website under ND-2015-20-E.

Please let me know if you should require any additional information.

Sincerely,

Hope H. Adams

Subject: Duke Power Transmission Plan, docket number ND-2015-20-E

Dear SC Public Service Commissioners,

I am writing to express my strong opposition to Duke Energy's plan to build the transmission substation and lines between Campobello, SC and Asheville, NC.

This area has been intentionally undeveloped because the value of the property is tied to its unspoiled beauty. As other areas become more busy, more and more tourists and investors are attracted to the foothills. There are fewer and fewer areas where folks can enjoy these kinds of views, waterfalls, and trails, and it mystifies me why this plan is even being considered.

Please explain to me why the purity of the foothills isn't valued more. The economic impact of this plan would destroy the value of the businesses and property that have been developed to embrace the pristine nature of the foothills. How can the Commission even consider the destruction of this area?

We all know that Duke Energy has vast resources, and that they have very intelligent people working there. Please tell them that they must devise another strategy to give more power to the Asheville area. Duke can do better, and our community needs you to stand up for us.

Sincerely, Sally Spencer
